

USDC PARTICIPANTS LIST FOR FIRMS, FACILITIES AND PRODUCTS

**U.S. Department of Commerce
Seafood Inspection Program
NOAA**

INTRODUCTION

This document has been developed by the Seafood Inspection Program, NOAA Fisheries, U.S. Department of Commerce (USDC). It is to be used as a reference for determining which fishery products have been produced in fish establishments approved by USDC. Only those processing establishments or vessels which have been sanitarily inspected, approved, and certified as being capable of producing safe, wholesome products in accordance with specific quality regulations promulgated by the USDC are listed.

To provide the user with a ready reference, the establishments or vessels are divided into four categories:

All establishments or vessels approved for sanitation and to produce inspected fishery products which may bear the official USDC Inspection and/or Grade Marks

Establishments approved for sanitation and to produce animal feed products

Establishments Contracting for Lot Inspection

Approved International Facilities

The firms and vessels listed in this document, at their own expense, voluntarily contracted with USDC for inspection services. They have demonstrated their ability to meet rigid standards of sanitation and the capability to produce safe, wholesome fishery products. NOAA Fisheries does not infer that plants not appearing on this list fail to meet rigid hygienic standards. This list is a compilation of those firms participating in the National USDC Seafood Inspection Program.

Products that are officially inspected may bear USDC Inspection Marks, i.e., U.S. Grade A, and/or Processed Under Federal Inspection (PUFI). Financially interested parties may request certification on products bearing or not bearing marks which is a written report that certifies the type of inspection, class, grade, quality, size, quantity, or condition of products (including the compliance of product with applicable specifications).

This document is published semi-annually and may be obtained by submitting your request to the address below stating your desire to be placed on the mailing list for the USDC Participants List for Firm, Facilities, and Products.

MINIMUM FLESH CONTENT REQUIREMENTS FOR USDC INSPECTED PRODUCTS

This list of minimum flesh requirements for standardized and non-standardized breaded and battered products is provided to assure all users of USDC inspected fishery products are aware of the minimum flesh requirements. These requirements apply to all species of battered and breaded fish and shellfish.

NOTE: USDC will certify coated, non-graded products without a standard of identity, etc., such as breaded fish sticks, breaded portions, and similar breaded fish products that contain less than 50% fish flesh if a statement immediately follows as part of the statement of identity declaring the amount of fish flesh actually present; e.g., “Breaded Fish Sticks Containing 45% Fish”.

¹ No USDC grading standard exists for products without Grade A percentages.

² FDA Standard of Identity requires product have 50% shrimp flesh by weight. If a product is labeled “lightly” breaded it must contain 65% shrimp flesh.

³ Any product with a Standard of Identity which contains less flesh than the standard requires must be labeled imitation.

⁴ Flesh content on oyster products can only be determined on an input weight basis during production.

OFFICIAL COOKED FISH YIELDS FOR SEAFOOD

The following list has been developed for both standardized and non-standardized products to make all users of USDC inspected fishery products aware of the official cooked yield factors approved to date for use when establishing the meat/meat alternate yields for USDA/FNS approved Child Nutrition statements. These factors, developed using standard AOAC* cooking procedures, can be used to determine seafood yield (converting the raw edible seafood weight to cooked seafood weight by multiplying the weight of raw seafood in the product by its yield factor).

COOKED YIELD FACTORS FOR SEAFOODS BASED UPON STANDARD AOAC COOKING PROCEDURES	
(1) Products cut from regular frozen fish blocks	78%
(2) Fresh or frozen fish fillets, skin-on or skinless	70%
(3) Products made from frozen minced fish blocks	75%
(4) Products made from fresh or frozen minced clams	66%
(5) Products made from fresh or frozen minced shrimp	58%
(6) Rehydrated dry salted cod (before cooking)	75%

* Association of Official Analytical Chemists, 15th Edition, Section 971.13.
